Siemens

RE : QA Manual Tester

Dear Hiring Manager,

Through out my career, I have contributed to impacting business outcomes through effective organization, prioritization, and execution of key projects. My Skills and qualifications are an ideal match to the QA Manual tester requirements and will bring immediate value to Siemens goals.

Previously, in my Associate Analyst Role, I exercised a calculated and methodical approach to problem solving. I am independently motivated, yet I appreciate team efforts and collaborate productively within groups. Additionally, I am knowledgeable in testing procedure development and project plan development with proficiency in Automation testing, yet I am not bound to Automation and would be enthusiastic to explore and learn any new product/software testing knowledge.

Because my professional goals align with Siemens's mission and values, this opportunity is especially exciting. I believe my collaboration, planning and problem-solving abilities will support and drive your continued organizational success.

To demonstrate the scope of my career history and professional competencies, please take a moment to review my resume. I appreciate your evaluation of my credentials and subsequent response.

Sincerely ,  
Sheshank Rao
